Yafet Hamouda JavaScript FullStack MERN Developer

I'm a progress driven person who likes learning new things, especially the technologies that make your company special. I started my coding journey with Low-level programming languages such as C, C++ and Assembly for the nature of my education and I obtained my Applied License degree in automation and embedded systems in 2016. I was also fascinated with the evolution of this field and how the web works so I continued my software engineering degree (current) mostly focused on developing both client and server side apps using Javascript.

Software engineering student | Tunisia, TN | +216 29 836 201 | yafet.hamouda1@gmail.com

Education

ESIP GAFSA | computer science degree | 2016 - 2019
